Introduction

Strategic user experience designer specialising in high-stakes insurtech and enterprise SaaS ecosystems. Proven track record of untangling complex regulatory workflows for global insurers, turning legacy debt into intuitive, future-proof digital applications. Expert in systems thinking and design token architecture, with a demonstrated ability to bridge the gap between stakeholders, business architects, and engineering teams to protect project scope and drive business ROI.

Professional experience

Guidewire | UX design consultant (Professional Services)

Senior UX Designer

2025 - present

- UX Lead for A Tier-1 global enterprise insurance and asset management corporation operating in over 70 countries. Stepped into a core leadership role for an environment of extreme complexity, normalizing years of legacy practices to design a modern white-labelled B2B2C digital application for motor and home insurance.

UX Designer 2

2023 - 2025

- Worked across multiple customer projects covering a range of lines of business, both commercial and personal, in various regions around the World.
- Designed the payments process flow, a high-complexity logic journey, for a Tier-1 specialty insurance group and leading London Market commercial underwriter.
- Acted as project UX lead when a more senior designer needed to roll off and configured custom branding and theming for 25+ distinct global brands.
- Graduated from the internal leadership programme and pioneered internal journey-mapping initiatives that documented and optimised the design-to-development hand-off process across global offices.

UX Designer

2022 - 2023

- Served as the first UX designer in the Global Service Centre consultants group.
- Worked on two EA projects, providing critical feedback to the PD and DS teams to improve Guidewire's design system and experience templates.
- Delivered internal design thinking workshop and coaching sessions.

Guidewire True Grit Digital Award 2024

Awarded for consistently demonstrating resilience, creativity, and a strong commitment during prolonged, challenging project conditions.

Education

Master of Interaction Design - 2.1

National College of Art and Design

October 2020 - September 2021

Partner project with Temple Street Children's Hospital

My major project was completed in partnership with Temple Street Children's Hospital. The brief was to enhance the experience of sleep deprived patients and parents and reduce the costs associated with wasted EEG appointments due to anxiety, under-preparation and misinformation. I used extensive user research to design a new sleep deprivation guide and redesigned the department's primary touchpoints.

Spark Innovation Award 2021

Mater-NCAD Design Week

Awarded for group project "In a Flap about Consent" which tackled the issue of obtaining truly informed consent from free flap surgery patients.

Other project work

- Understanding and communicating Dublin City Council's Beta Innovation Model.
- Electromechanical Prototype to discourage mobile idle browsing.

Bachelor of Arts in Photography - First class honours

Institute of Art Design and Technology

September 2010 - June 2014

Other interests

Cycling, chess, swimming, gardening, dancing, travel and photography.
